Motion Control

Welcome to Camloc Motion Control

We have been manufacturing bespoke gas springs, struts and damper motion control solutions in the UK for over 30 years.

The Camloc Experience

- **We work to your production schedule.**
- Your time is valuable and we know that keeping to your schedule is essential to saving you money and headaches.
- **Our high-quality products are right first time and reduce your operational downtime.**
- Shutting down a machine due to a faulty gas spring is never ideal. We minimise that time by ensuring quality products every time.
- **Each project is assigned a named engineer.**
- With Camloc, you will never be passed from pillar to post as every project is assigned a named engineer to be with you every step of the way.
- **Our in-house production means we can make each gas strut to your exact requirements.**
- Whatever the challenge, whatever the weight, whatever the angle, we find your solution.

Don't just take our word for it

Industry examples

Spencer Wills

Business Development Director, Clarendon Specialty Fasteners

"The Camloc team are great to work with, they instinctively understand our requirements, save us time and take the headache out of our gas strut and motion control challenges. They always do everything they can to make the whole process easy for us."
